The joule (/ dʒ uː l /; symbol: J) is a derived unit of energy in the International System of Units. It is equal to the energy transferred to (or work done on) an object when a force of one newton acts on that object in the direction of its motion through a distance of one metre (1 newton metre or N·m).

I am from India and I can say that Michael is no lesser than a deity over here. You can go to any corner of India, to the most rural of areas, to the slums where the poorest live and you will find people who have heard of MJ.
