

Download Nonionic Polymer

Packaging 10, 50 g in glass bottle Application Polyacrylamide is used in the preparation of acrylamide gels for separation of proteins. General description A nonionic liquid polymer of the alkyl aryl polyether alcohol type. Used as a surfactant. Packaging 50 g in glass bottle CHINAFLOC--professional manufacturer and supplier of Acrylamide, Polyacrylamide and Flocculant, top ten of China, exporting over 58 countries. We produce such as Anionic polyacrylamide, Cationic polyacrylamide, flocculant, etc. Provides water chemicals and equipment for potable, waste and process water in industrial, municipal and mining treatment systems. Over 500 formulations are available plus custom blending. Tramfloc manufactures flocculants, coagulants, water soluble polymers, emulsion breakers, dewatering agents, tailings and concentrate treatment.
